

## Speedy Green

### Grass mixture for sports fields and other applications

- Fast germination and fast establishment
- Suitable for restoring sports fields, parks and intensively used areas
- Excellent wear tolerance

#### Fast germination and fast establishment

As befits a grass seed mixture specifically intended for overseeding, Speedy Green® germinates and establishes quickly, restoring your sward to its former splendour in less than no time. In the summer months, Speedy Green® is the ideal mixture for turning a turf full of bare patches into a strong, attractive sward.

#### Suitable for restoring sports fields, parks and intensively used areas

Speedy Green® is ideal for sports fields, but can also be used in parks and other intensively used areas. Many managers of public green spaces now swear by Speedy Green® when they face the task of quickly creating an attractive sward in the summer months.

#### Excellent wear tolerance

Overseeding with Speedy Green® results in a sward with an excellent wear tolerance, making bare patches disappear while also preventing the risk of them reappearing quickly.

### Specifications

Speed of establishment	very fast
Nitrogen requirement	high
Speed of growth	fast
Sowing rate	1.5-2.5 kg/100m <sup>2</sup>
Mowing height	from 20 mm
Packaging	15 kg

### Composition

## Sport

Based on many years of accumulated knowledge and experience, Barenbrug offers products for a wide range of applications. And we have the references to prove it. Barenbrug turf grasses are used in international leagues and prestigious events like the UEFA European Championship, the football World Cup and the Olympic Games.

- New seeding  
 Overseeding

### Characteristics

Fast establishment

Self repairing

High wear tolerance

High drought tolerance

Germination low temperatures 6°C

Requires less irrigation

Requires less fertilisers

Requires less pesticide

100% Lolium perenne
